

AZHAN JAVED

Data Analyst | Data Engineering Enthusiast

azhanj21004@gmail.com | +91-9506996881

github.com/azhanj21004-maker | linkedin.com/in/azhan-javed

Professional Summary

Aspiring Data Engineer with hands-on experience in Python, SQL, and end-to-end data pipeline work — including data cleaning, database schema design, and structured data integration. Skilled at transforming raw, messy datasets into structured, analysis-ready systems. Strong foundation in data structures and database management, with a track record of building and deploying data-driven applications.

Education

VIT Bhopal University	2023 – 2027
Bachelor of Technology in Computer Science Engineering	
CGPA: 8.29	
Class XII (Higher Secondary)	93%
Class X (Secondary)	94.2%

Technical Skills

Languages	Python, SQL, Java
Data Engineering	Data Preprocessing & Cleaning, Database Schema Design (MySQL)
Data Analysis	Pandas, NumPy, Power BI, Microsoft Excel
Tools	GitHub, Jupyter Notebook, MySQL
Machine Learning	Decision Trees, KNN, TF-IDF, Cosine Similarity
Core CS	Data Structures, Database Management Systems

Projects

Sales Performance Dashboard *Python, Pandas, Power BI*

github.com/azhanj21004-maker/sales-dashboard-portfolio

- Built a data cleaning pipeline in Python to process 2,800+ sales records — handling null values, duplicates, and outliers before analysis.
- Developed an interactive Power BI dashboard featuring six visualizations, dynamic slicers, and custom KPI measures using DAX.
- Identified revenue trends and top-performing markets to support business decision-making.

Enterprise Management System *Java, MySQL*

- Developed an Enterprise Management System for secure information management, focused in the medical fraternity.
- Designed an optimized MySQL database schema for efficient data storage and retrieval.
- Collaborated with team members to integrate backend modules and improve system performance.

What'Z Next? — ML-Powered Movie Recommendation System *Python, Scikit-learn, Pandas*

github.com/azhanj21004-maker/What-Z-Next-

- Built a content-based recommendation engine using TF-IDF vectorization and cosine similarity on the TMDB 5000 dataset.
- Pulled and displayed live movie data (posters, ratings, descriptions) by integrating an external movie database.

Leadership Experience

Secretary — VITERA Club, VIT Bhopal University	2023 – 2025
Coordinated technical events and workshops for a community of more than 100 students.	
Managed event documentation and facilitated collaboration across organizing teams.	

Soft Skills

Analytical Thinking • Problem Solving • Team Collaboration • Communication • Attention to Detail
